

*Deane Systems LLC is a designer & manufacturer of automatic and semi-automatic screwdrivers, Step-Lift fastener feeders, diverters, and compact powered slides for various applications.*

*Our systems range from compact units for manual, semi-automatic & fully automated screw driving applications to large fixed floor stations and assembly cell applications. The range of applications and industries that our machines can be used for is the automotive, appliance, semi trailer fabrication, electronic, fastener, aircraft/aerospace, marine, atv / orv manufacturing, building/construction, furniture, die casting, injection mold, in die fastening, robotic, manually loaded stations, and in-mold delivery.*

*Our experience is not limited to just screws and bolts. We regularly build assembly systems for nuts, push pins, roll pins, dowels, washers, rivets, spring nuts, weld nuts, studs, and snap in fasteners just to name a few.*

*Our tubing is made from high grade plastics with a high durometer and thicker walls for a long lasting life cycle which translates to a high abrasion resistant tubing which requires less change out and lower cost to our customers. For quotes or our current list of sizes please call Nate @ Ph – 989-348-1217 x 13 or e-mail [nginther@deanesystems.com](mailto:nginther@deanesystems.com).*

#### Materials Used

Urethane

Nylon

Vinyl

**By purchasing full rolls of our tubing we automatically deduct 30-40% off for further savings**

#### Profiles Offered

Round

Square

Rectangular

Hexagon - ID
