

Deane Systems LLC · *Receiver / Driver Assemblies*

These units offer a slim compact modular design for fastening and or placement applications. Hard coat anodized aluminum bodies offer a lightweight option to the solid steel receivers. Each one has hardened steel insert sleeves and jaws which are electro-less nickel plated for a clean, corrosion free surface. Standard quick release components for the jaws, body sleeve and entrance sleeves allow for quicker change out and less downtime. Using our H-Series receivers we have fed screws, bolts, nuts, pins, dowels among others for our customers.

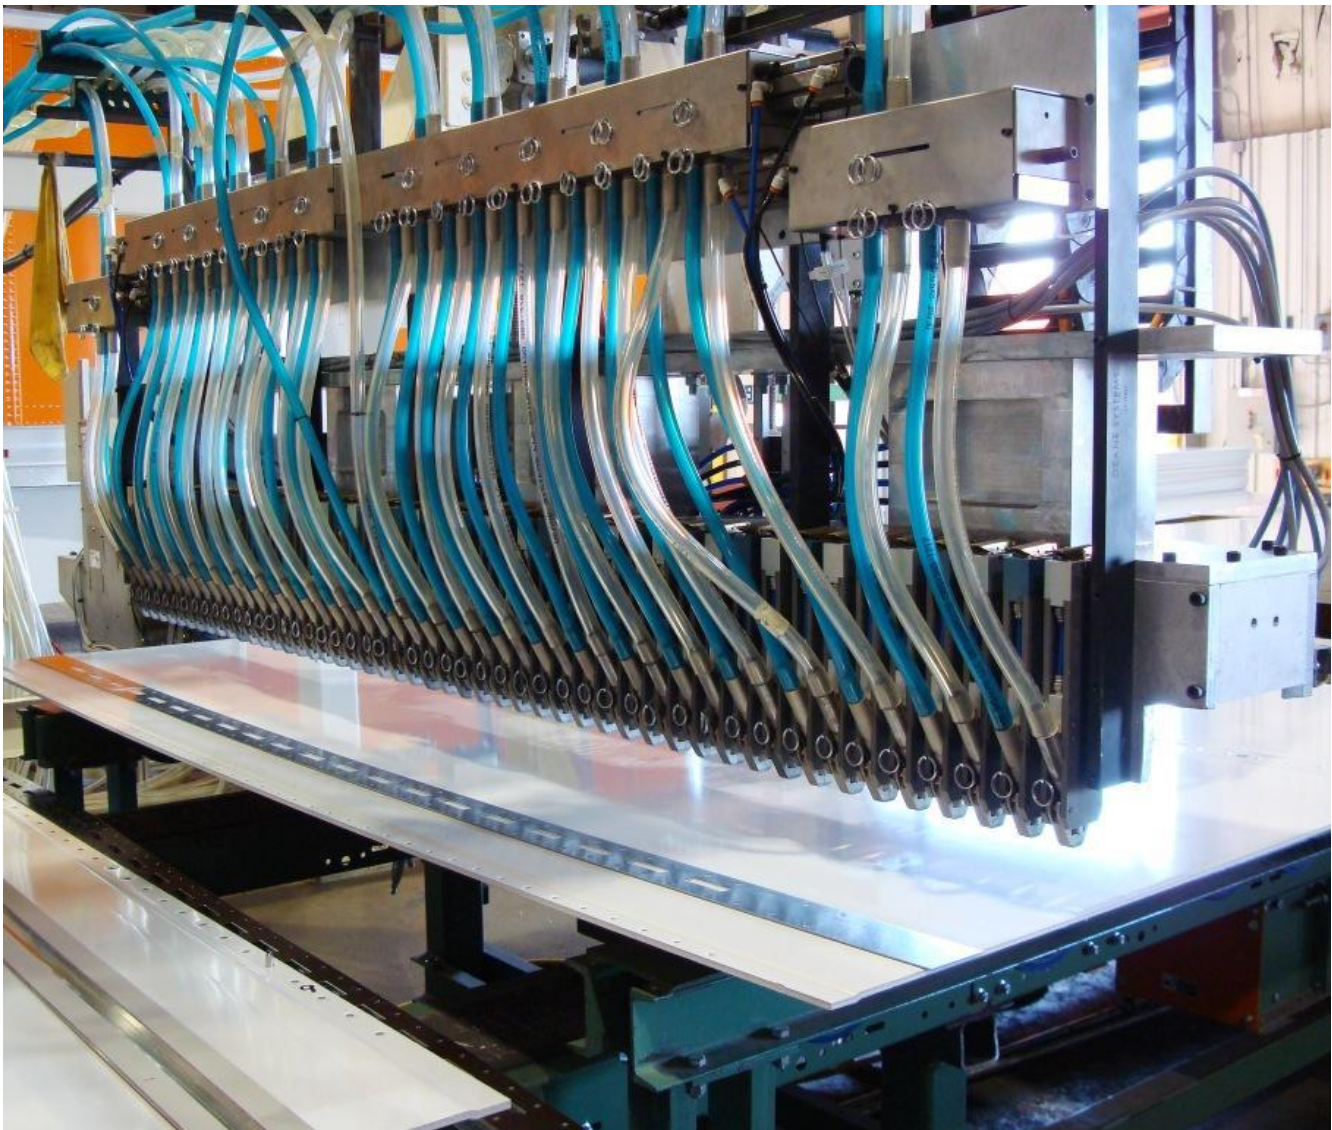

On the drive motor advance and receiver advance options we utilize standard off the shelf air cylinders and car / rail units which are readily available by local and national distributors.

Quantity discounts available for units listed below.

H – Series receivers only with standard jaws, entrance sleeve and rear flange mount. Note Suffix number denotes maximum feed path size for reference only. For Force requirements for pressing thru receiver – see chart below

SERIES	MAX I.D.	LIST PRICE	PRICE W/ BUILT IN CYL	FORCE = x PSI	REF. SLEEVE DIA
H – 1	.437	1050.00	1650.00	.307	.625
H – 2	.570	1325.00	1975.00	.600	.875
H – 3	.750	1725.00	2400.00	.785	1.00
H – 4	.850	2240.00	3700.00	1.227	1.250
H – 5	1.040	2950.00	TBD	TBD	1.500
H – 6	1.290	3850.00	TBD	TBD	1.750

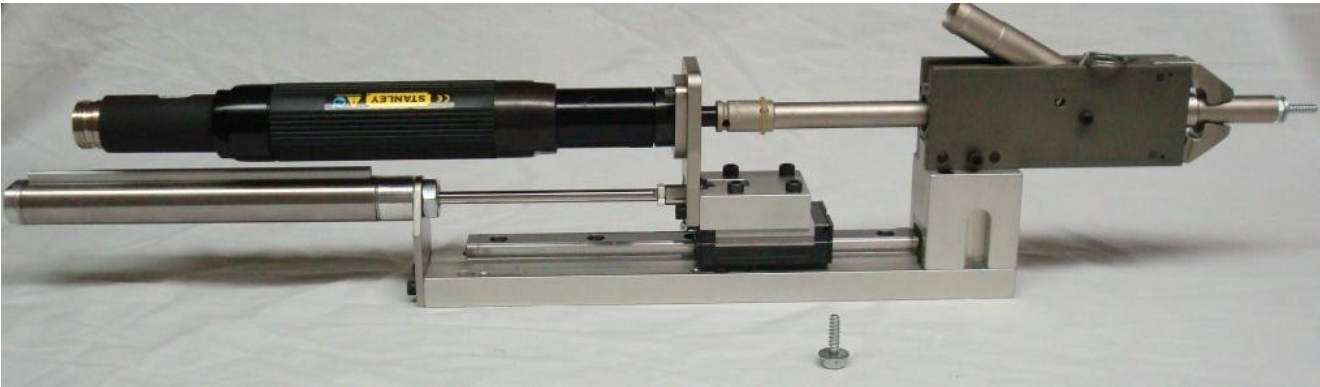

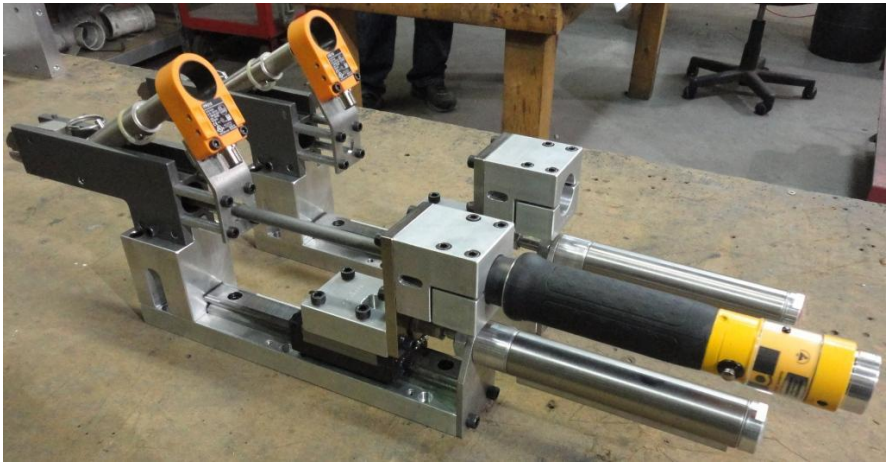

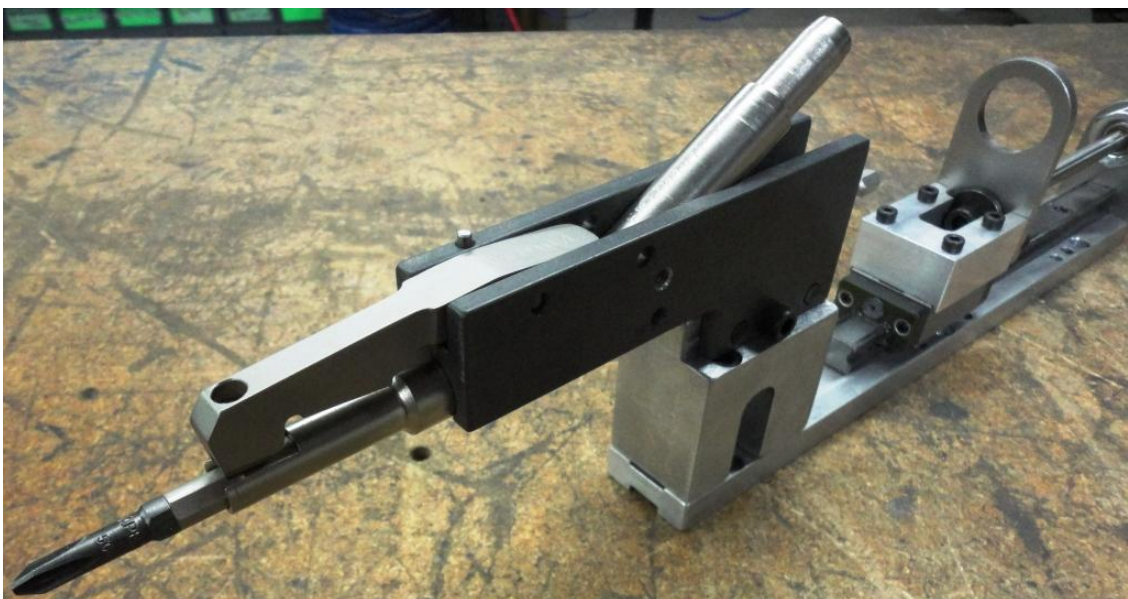

H SERIES – UNITS WITH DRIVE MOTOR ADVANCE ONLY (IE FOR ROBOT OR CUSTOMERS SLIDE APPLICATIONS)

Includes H-series receiver, receiver KWIK mount, mount base, (1) car / rail unit with air cylinder, motor mount and plain bit or socket extension. – Note Suffix letters denote driver advance only.

SERIES	LIST PRICE
H 1 - DA	2100.00
H2 – DA	2200.00
H3 – DA	2300.00
H4 – DA	3400.00

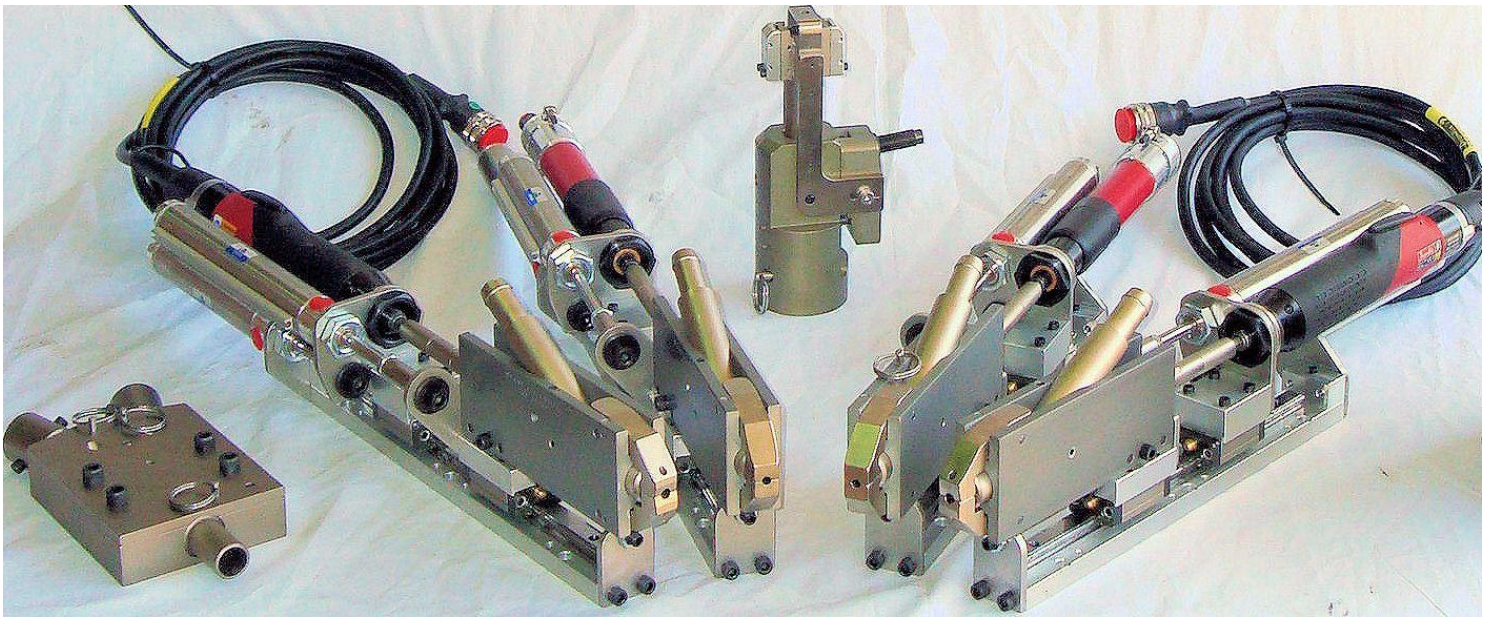

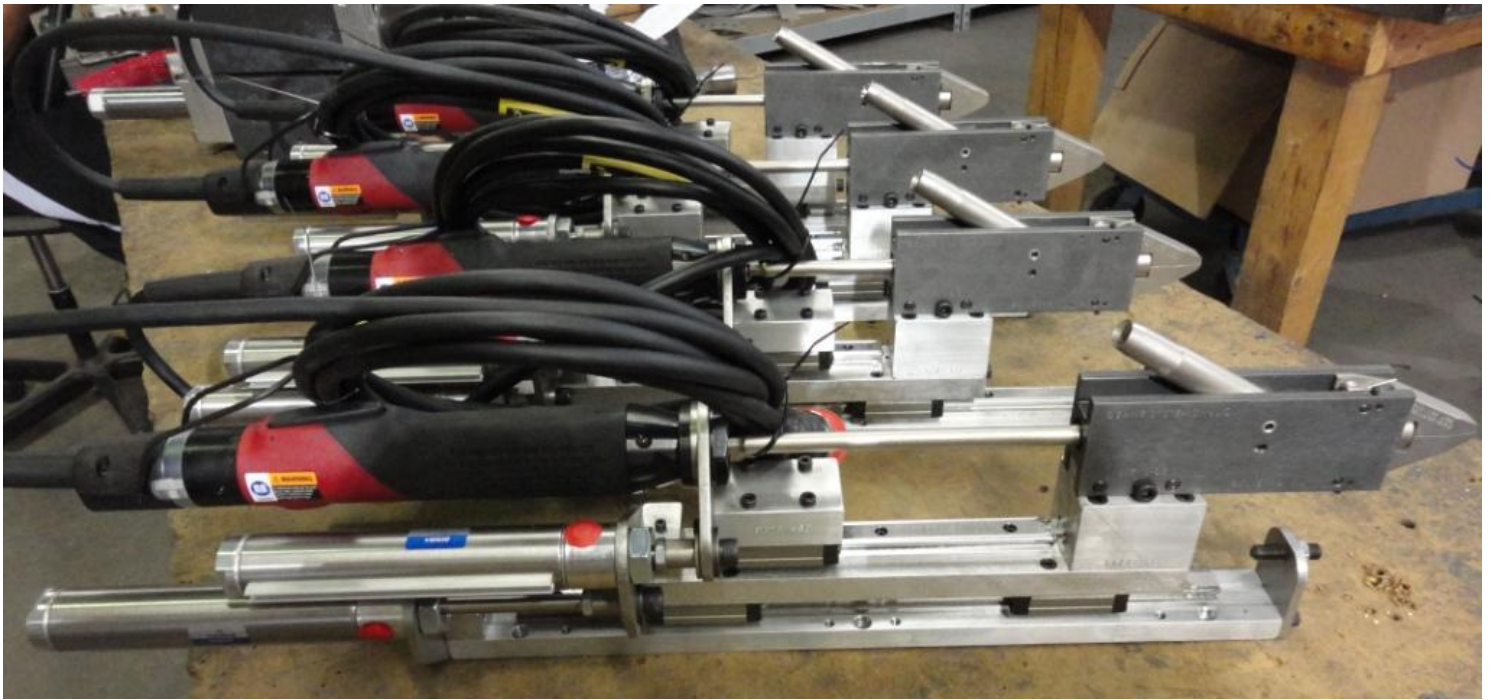

H SERIES – UNITS WITH DRIVE MOTOR ADVANCE AND RECEIVER ADVANCE (IE; FOR STATIONARY APPLICATIONS)

Includes mount base, (2) car / rail units with air cylinders, receiver KWIK mount, motor mount and rigid bit or socket extension. Note – Suffix letters denote driver and receiver advance.

SERIES	LIST PRICE
H 1 - DRA	2800.00
H2 – DRA	3300.00
H3 – DRA	3500.00
H4 – DRA	4700.00

Below are the various options for the above listed assembly units to aid in difficult to reach areas, problem fasteners – ie ones that tend to tumble or flip over, nut driving, vertical up driving and additional slide stroke other than standard.

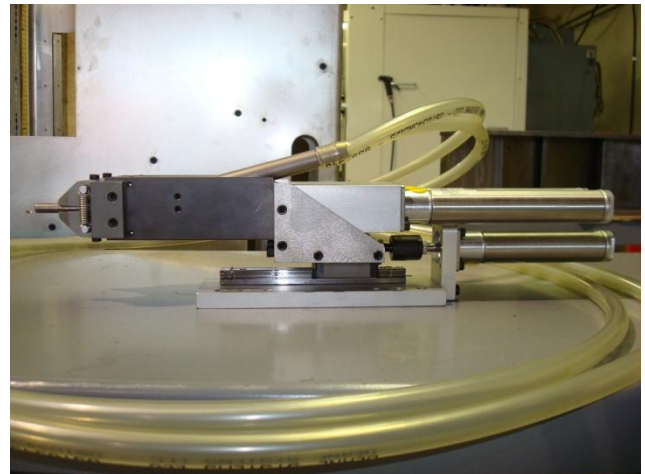

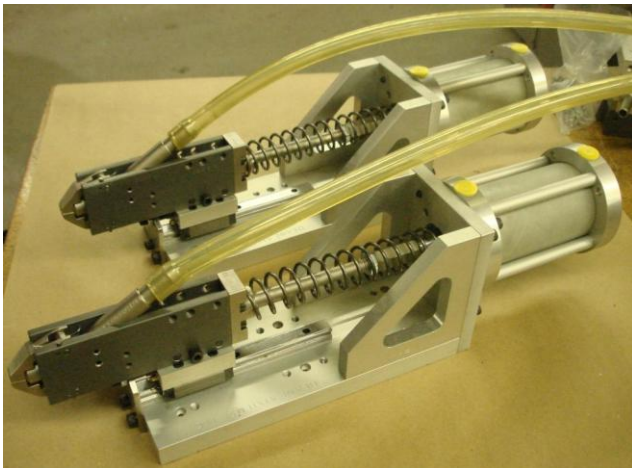

DESCRIPTION	H - 1	H - 2	H - 3	H - 4
SINGLE JAW UNIT WITH EMBEDDED MAGNET	130.00	145.00	160.00	175.00
JUNCTION GATE – FLAT BLADE TYPE	145.00	155.00	170.00	190.00
JUNCTION GATE JAW	190.00	210.00	230.00	230.00
SIDE ENTRY – NUT STYLE JAW SET	650.00	690.00	765.00	850.00
3 POS. DRIVE UNIT ADV. – VERTICAL UP DRIVE	110.00	125.00	145.00	185.00
SLIDE STROKE – RECEIVER OR DRIVE MOTOR COST FOR EACH ADDITIONAL INCH OF STROKE	55.00	75.00	90.00	105.00

SPRING LOADED BIT OR SOCKET EXTENSIONS

Note – Used when drive motors are mounted on a common slide.

DESCRIPTION	PRICE EACH
¼" or 3/8" SQUARE DRIVE	575.00
½ " SQUARE DRIVE	625.00

Below are some press receivers we have built for customers. The one on the left was used for pressing screws into fire-fighting handles and the other was used for rivet insertion into door knob assemblies
